

**TECHNICAL DATA**

**FILL-IN-BOX S1 / FILL-IN-BOX S2**

Dimensions:	Width: 1,5 m Depth: 0,5 m Height: 1,25 m
Weight:	About 300 kg
Installation:	On the long sides
Power supply:	230 V AC
Types:	FILL-IN-BOX S1 – automatic separation and transfer to the commissioning system  FILL-IN-BOX S2 – automatic separation and transfer to the commissioning system with an automatic registration of the packs.
Separation:	Up to 1500 packs/h
Identification:	Up to 1500 packs/h
Stockpiling:	Up to 300 packs/h
Capacity:	About 250 packs without buffer conveyor (75 l funnel volume), by installation of a buffer conveyor belt expandable up to several thousand packs.
Design:	The front side is made of printed safety glass, various colours and designs of the glass are possible.

Due to the modular construction method of MACH4 commissioning systems the retrofit of FILL-IN-BOX is possible.
